

IBM Storage Solutions

IBM System Storage offers storage devices to help you store, safeguard, retrieve and share your data while helping extend your ability to be as open, as safe and as fast as you need to be.

The portfolio can be split into the following main parts:

- Disk Storage
- Tape Storage
- Storage Area Network (SAN)
- Network Attached Storage (NAS)
- nSerie

- Storage Software

- Disk Storage

IBM has brought together into one family a broad range of disk systems to help small to large-size enterprises select the right solutions for their needs. This family is complemented by a full range of IBM TotalStorage capabilities like advanced copy services, management tools, and virtualization services to help protect your data.

- Tape Storage

IBM tape products meet the needs of customers seeking solutions for data archiving, backup, and disaster recovery. As information-technology budgets shrink, low-cost tape storage has become more attractive as a way to manage ever increasing corporate data growth.

- Storage Area Network

IBM TotalStorage Area Network products and solutions provide integrated SAN solutions, suited for small to large business needs.

- Network Attached Storage

IBM Network attached storage (NAS) products provide a wide-range of network attachment capabilities to a broad range of host and client systems.

- IBM System Storage N Series hardware

- IBM System Storage N7000

- IBM System Storage N5000

- IBM System Storage N3000

- IBM System Storage N3700

- IBM System Storage N7000
Gateway

- IBM System Storage N5000
Gateway

- IBM System Storage N Series softwares

- SnapManager® for SAP

- SnapManager® for Microsoft®
Exchange

- SnapManager for Oracle

- SnapManager for Microsoft
SQL server

- Protection Manager
- Operations Manager
- Virtual File Manager

- Storage Software

Tivoli Storage Manager

Manage risk through complete storage management with enhanced performance and access for Sequential Disk. Manage complexity with encryption key management. Manage growth with Tivoli Storage Manager's proven technology , shared by more than 21,000 customers. Go Green with progressive backup to only backup new and changed files, helping reduce your need for storage space, large servers and power.

System Storage Productivity Center

Like a universal remote control that will manage multiple devices, the IBM System Storage Productivity Center (SSPC) will allow storage administrators to configure multiple storage devices including IBM System Storage DS8000 series.
