

Hardware IBM

IBM requires its Business Partners to meet certain standards and obtain several certifications in order to sell, install and configure their products. IRIS ICT people have the necessary certifications to provide a large range as described below. We are the Best Partner IBM in 2006 and we hope to continue and improve the confidence our customers gave us. Being a PREMIER IBM business partner with a FIRST TIER status implies of our consultants yearly investments in product knowledge and technical skills, but offers that customer that we have the competences and know-how to meet your expectations.

We can install and configure the following hardware:

- System x

-

System p

- System z

-

Blade center

-

Storage Solutions
